Art Unit: 1745

## **DETAILED ACTION**

## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 12-16, drawn to a seal-separator or seal-membrane electrode assembly conjugation for a fuel cell, classified in class 429, subclass 35.
- II. Claims 9-10, drawn to a process for producing a seal-separator conjugation for a fuel cell, classified in class 429, subclass 35.
- III. Claim 11, drawn to a process for producing a seal-separator conjugation for a fuel cell, classified in class 429, subclass 35.
- IV. Claim 17, drawn to a process for producing a seal-membrane electrode assembly conjugation for a fuel cell, classified in class 429, subclass 35.
- V. Claim 18, drawn to a process for producing a seal-membrane electrode assembly conjugation for a fuel cell, classified in class 429, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II, III, IV, V are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another materially different process.

Application/Control Number: 10/721,784 Page 3

Art Unit: 1745

3. The product, a seal-separator or seal-membrane electrode assembly conjugation for a fuel cell, can be made by one of the four processes claimed in Groups II, III, IV, and V. Group II claims a process by which the assembly is made by attaching seals to the separators without the use of a mold. Group III is drawn to a process by which the assembly is made by attaching seals to the separators with the use of a mold. Group IV is drawn to a process by which the assembly is made by attaching seals to the membrane electrode assembly without the use of a mold. Group V is drawn to a process by which the assembly is made by attaching seals to the membrane electrode assembly with the use of a mold.

4. This application contains claims directed to the following patentably distinct species: a seal-separator conjugation for a fuel cell and a seal-membrane electrode assembly conjugation for a fuel cell. The species are independent or distinct because the seals are formed on different parts.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Application/Control Number: 10/721,784

Art Unit: 1745

of claims to additional species which depend from or otherwise require all the limitations

Upon the allowance of a generic claim, applicant will be entitled to consideration

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

5. Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Alix Elizabeth Echelmeyer whose telephone number is

571-272-1101. The examiner can normally be reached on Mon-Fri 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Patrick J. Ryan can be reached on 571-272-1292. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.
